

# PRODUCTS AND SERVICES

*The premier coating, insulation and prefabrication company*

The Bayou Companies, LLC has been providing high quality pipe coating products and welding services to the oil and gas industry for over 70 years. With two locations, Bayou offers a variety of products and services for your onshore and offshore needs.

We are a premier coating, insulation and fabrication company. Our services and products span from the industry standard FBE coatings to complex deepwater insulations, SCR welding capabilities and quad joint fabrication. Our main facility, located on over 250 acres in New Iberia, Louisiana, has multiple barge, rail and truck loading/unloading capabilities. Bayou also has a facility located in Camrose, Alberta, Canada.

Bayou has all the capabilities necessary to complement onshore, offshore and even the most challenging deepwater projects.

## Facilities

### New Iberia, Louisiana

- Two OD FBE coating plants
  - 2-inch through 48-inch OD
  - Lengths up to 80 feet
  - FBE and 2-layer FBE for higher temperature or abrasion resistance
  - 3-layer PE / PP
  - PP insulation
- InnerGard™ ID FBE coating plant
  - 6-inch through 24-inch OD
  - 40-foot lengths

*An Aegion Company*

# PRODUCTS AND SERVICES

## New Iberia, Louisiana (continued)

- ID flow efficiency coating plant
  - 4-inch through 48-inch OD
  - 40-foot lengths
- Bayou Wasco insulation plant
  - 2-inch through 24-inch OD
  - 30-foot through 80-foot lengths
  - Multi-layer polypropylene
  - Syntactic polyurethane coatings (GSPU)
  - Dow NEPTUNE™ insulation system
- Two portable concrete coating plants
  - 6-inch through 48-inch OD
  - 38-foot through 42-foot lengths
- Portable custom coating plant
- Pipe multi-jointing
  - Two quad racks (165-foot lengths)
  - 540-foot pipe-in-pipe insertion rack
- Double jointing – anode and anode taper installation – buckle arrestor insertion
  - Two double joint shops
  - Buckle arrestor insertion shop with overhead cranes
  - Portable large diameter double joint rack
  - Areas for field joint coating
  - Capable of double jointing large-diameter pipe at plant production speeds
  - Custom installation of anodes
  - Single or dual Flomax tapers poured for anode retention and traversing rollers

- Pipe bending plant
  - 1-inch through 8-inch pipe
  - All thickness Sch. 40 and above
  - Carbon and stainless steel
  - Single or multiple ends in different planes
  - Range of angles from 0° to 180°
  - Bending radius is 3R and 5R
  - Bare or coated pipe up to 44 feet
  - Inventory available for most bends
- Clad welding
  - 1800-square-foot Clad research and development facility
  - Computer controlled processes
  - Climate controlled facility
- Handling
  - Over 250 acres of storage
  - 6,000 linear feet of waterfront capable of handling up to 100-foot by 400-foot barges
  - 250-ton and 70-ton crawler cranes
  - 70-ton cherry picker
  - 14 wheel loaders
  - Three excavators with vacuum lifter attachments
  - Two bucket loaders
  - Capacity to load 89-foot flat railcars within our facility
  - Ability to load unit trains
  - Onsite truck and rail access
  - Primer and thinner
  - JIFFY padding

## Camrose, Alberta, Canada

- OD coating facility
  - Two coating lines for 2-inch to 60-inch pipe
  - Fusion Bond Epoxy, Ultra FBE
  - Dual powder abrasion resistant FBE, Ultra FBE abrasion
  - Dual powder high temp FBE, Ultra Nap-Gard® Gold
  - Two-layer polyethylene coatings, Ultrabond RA
  - Three-layer polyethylene coatings, Ultrabond IIISE
  - Polyurethane foam insulation, Ultrafoam TA and XTRU-THERM™
- Insulation facility
  - Aboveground insulation systems, HI-GARD™
  - Application of heat tracing and leak detection for insulated pipe
  - 200+ acre facility
  - 40,000 square-foot plant
  - Focuses on steam assisted gravity drainage projects
  - Controlled environment for insulation application
- Anti-corrosion products
  - Tapes
  - 2-part epoxy
  - Heat shrink sleeves
  - Other field joint material
  - Arc spray metallizing
- Handling
  - On-site truck and rail access

## Ancillary Services

- Beveling
- Boring
- End measuring / matching
- End conditioning
- Bar code traceability system
